

The Gilead Centre

Family Rates

The initial appointment is full price for the first adult family member. Initial appointments are at 25% off for subsequent family members held within the same visit. If one appointment is a follow up and one is an initial consultation, the initial consultation will be billed at full price and the follow up appointment will be billed at a 50% off discount. (The family maximum cap will not apply in this circumstance). The discount does not apply to combination initial visits, as the fee has already been greatly discounted.

For follow up Heilkunst appointments (held within the same visit) the first person pays regular price, and each subsequent immediate family member pays half price to a maximum of \$150.00 for a family of four. Please add \$25.00 for each additional person over the maximum.

Follow up live Blood Analysis appointments remain at full price for the first person and 50% off per subsequent family member due to the cost of microscopy supplies.

Family members refer to the mother, father and their children 18 years of age and under who are living at home.

Follow up visits are scheduled every 4-6 weeks.
